Approved Courses

Normally all graduate-level courses are numbered 6000 and above. Graduate students may take courses **numbered 5000-5999** if they are part of the program of study or with the approval of the faculty adviser. For the 6000 level or above, the general prerequisite, in addition to admission to graduate studies, is 12 credit hours of advanced work in the department, or six credit hours in the department and six in a closely related program approved by the major department and the dean for the Office of Research and Graduate Studies. If other specific prerequisites are needed, these are stated in departmental listings of courses.

Lyle School of Engineering Operations Research and Engineering Management Graduate Programs

Leaders need more than technical knowledge in today's complex working world. OREM **(formerly EMIS)** programs develop leadership, engineering and management skills for success in technology-based organizations. The same systems-oriented, mathematical model-based approach to design – which has been the cornerstone of engineering for decades – has powerful application within technology-based organizations.
